Advanced-Technology Company Pursues Reliability, Creativity & Performance

I wish to extend my whole-hearted appreciation, on the behalf of the family of H S bearing company (HSB) to all of you for all the support you have ever given to us, and your continuous cooperation and patronage is always highly appreciated.

GREETING

Dear customers,

H S Bearing Co., Ltd. was established as a company specializing in production of auto parts and industrial bearing in Mar 1975.

Manufacturing of industrial special bearing requiring a high technology has enable this company to initiate a new start.

This corporation especially focuses on making quality products through technical cooperation with sophisticated foreign companies with emphasis on the continuous development of required technologies and innovation of management by the integrated effort of all the members of this company in order to expand into advance technology fields of auto parts and special bearing industries.

Techniques and experiences accumulated by this company will help maintain the perfect quality of our products and enhance the quality through consolidated correction system and various test instruments established and equipped by the company for the goods to meet customers needs.

And also our excellent specialists are exerting their total and endless efforts for research and development with faith. The final process is customers.

I want to take this opportunity to commit my best effort and to devote myself, as a member of and the person responsible for this business, to the management and maximum efficiency for the quality of the product. I wish to extend my whole-hearted appreciation, on the behalf of the family of H S bearing company (HSB) to all of you for all the support you have ever given to us, and your continuous cooperation and patronage is always highly appreciated.

Thank you.

President Young Chull Ahn

Our excellent specialists are exerting their total and endless efforts for research and envelopment with faith.

HISTORY

1975 03	Hyup Shin Precision Co. founded.
1981 06	Converted to Hyup Shin Machinery Co., Ltd.
1983 04	Registered as a Gold Star supplier by Daewoo Motors Co., Hyundai Motors Co., Kia Motors Co., Asia Motors Co., Hyundai Co.,(USA Q.C.C) and Daewoo heavy Industries Co.,
1986 08	Completed MOCIE project to localize transmission parts, fork shifts and bush, of localize of 3 kinds of Forklift truck parts roller bearings
1987 06	Developed Mast Roller Bearings of Forklift truck and Approved Quality by USA Caterpillar and CLARK.
1988 01	Established auxiliary research institute (approved by the Ministry of Science and Technology)
1989 10	Second president Young-Chull Ahn took office.
1990 11	Chosen as parts supplier by Samsung Clark, Tongmyoung, Halla and Hyundai heavy Co.,
1993 11	Awarded Presidential Export Tower and KITA Chairman Award (Korea International Trade Association) on Korea Trade Day
1996 10	Constructed No.2 Factory at Kimhae city
1998 02	Acquired ISO 9001 Quality System Certification
1998 08	Selected the Venture Industry Corporation by the small Medium Industry Promotion Corporation
1999 03	Selected as the company of technology innovation(by SMIPC)
2000 12	QS9000 Quality System Certification(SIRA)
2001 03	Technology Innovation and development project (Korean small Technology Credit Guarantee Fund)
2001 03	Selected as a Superior Technology Company (Korean Technology Credit Guarantee Fund)
2003 01	Selected the Venture Business Corporation (Korean small Medium Business Promotion Administration)
2003 11	Selected as a Quality recommend products (by Incheon)
2003 12	ISO/TS16949:2002 Quality System Certification (KFQ)
2006 06	Reselected as a small medium industry prospected export
2006 08	Converted to H S Bearing Co., Ltd.
2007 03	Selected Inno-Biz (Small & Medium Business Administration)
2008 12	Selected as the Top First Rated Enterprise from DooSan Infracore, and Clark. Accomplishment of GM DaeWoo 20 ppm(2005~2008)
2010 08	Renewed ISO / TS 16949 : 2009 Quality system Certification (KFQ)
2010 10	Established the Third Factory Plant in China

THE BEST TECHNOLOGY THE BEST SERVICE
HS BEARING CO., LTD.

PRODUCT

ANGULAR CONTACT BALL BEARINGS

- This bearing is developed to be used in the decelerator of excavator driving motor, and characterized by its capacity of high load(radial and axial) and moment, low rotating speed(less than 60rpm), and oil lubrication.
- It is usually arranged in pair to sustain the axial load in both direction. So called 'Isolated-retainer' is used for ease of making and assembling. This type of retainer has lower noise than the steel retainer during operation.

DEEP GROOVE BALL BEARINGS

- Range of production
 - 6000 ~ 6018 (Inside diameter $\phi 10 \sim \phi 90$)
 - 6200 ~ 6217 (Inside diameter $\phi 10 \sim \phi 85$)
 - 6300 ~ 6316 (Inside diameter $\phi 10 \sim \phi 80$)
 - Merits
 - Super precision deep groove ball bearings are designed to achieve smooth quiet running. They are therefore especially appropriate for applications with high demands for - quiet running, -minimum vibration, -ultra high speed.
- Application : Air - conditioner, Washing Machine, Pumps, Elevators, Escalators, etc

SHEAVE BEARINGS

- "Sheave Bearings" are special cylindrical roller bearings made into the perfect unit suitable for each purpose.
 - For application to the sheave, this compact type of bearings can receive sufficiently large load and has sufficiently high allowable speed.
- Accessories around the bearings are simplified for an easy installation. A maintenance of the bearings is easy, with anti-corrosion treatment.

SPECIAL ROLLER BEARINGS

- Thrust Bearings
- Taper Bearings
- Spherical Plain Bearing
- Bushing

FORK-LIFT TRUCK BEARINGS

Installed on more than 1,200,000 forklifts over the past 20 years, our bearings have been used under various environments in numerous countries around the world and have gained high marks for their quality. Various items for 0.5-ton to more than 15-ton forklifts are designed, produced and tested in-house for domestic and foreign forklift truck markers.

Wheel-Chain Bearings

- Roller Ass'ys
- Sheave-Chain
